SKILLS

- TypeScript
- Semantic HTML
- Accessibility
- Responsive Web Design
- React.js
- Next.js
- CSS

ABOUT

I am a front-end developer with a focus on accessibility. I love working on UI because of the fun problem solving that is required to make everything beautiful, accessible, and fast in every possible window dimension.

Human code first, AI review later. AI helps me to consider more ways of thinking, but it doesn't do my thinking for me!

WORK EXPERIENCE

2023–2024
• Software Engineer – UI
CIQ, Inc.

- Developed and maintained a variety of web apps and user interfaces, ensuring robust performance and user-centric design supported by researched-based UX principles.

- Created a React-based component library, significantly accelerating product development and facilitating scalability across our technology stack.

- Developed and improved accessibility of components and apps by learning and implementing latest accessibility standards.

2022–2023
• Engineering Apprentice
CIQ, Inc.

- Learned how to operate within a small UI team, utilizing a Scrum framework to advance tickets using Jira.

- Collaborated with a graphic designer to iterate and implement designs.

- Used TypeScript, Next.js, React-Router, and TanStack-Table.

2018–2022
• Self-Taught Web Developer
Wherever an internet connection can be found

- Learned foundational skills relevant to the field of front-end development.

- Researched and implemented WCAG accessibility standards in projects.

- Collaborated with a graphic designer to bring multiple mobile-first website designs to life.
